Domain report: clovidomains.com

A real run on our own kept domain

OUR OWN KEPT DOMAIN • REAL RUN 9 OCTOBER 2026 • NOT A CUSTOMER RESULT

DOMAIN	clovidomains.com
RUN	2026-10-09 17:35 UTC
CHECKS	4 of 8 ran
MAIL HEALTH	fail
REGISTERED	2026-10-08 · expires 2027-10-08

Overview

4 of 8 checks answered
18.1 s run time
2027-10-08 expires
off auto-renew
7 extensions priced
8 platforms checked

NO SITE

Website

no A/AAAA records

FAIL

Mail

no MX, SPF or DMARC

HELD

Registration

ours · expires 2027-10-08

CLEAN

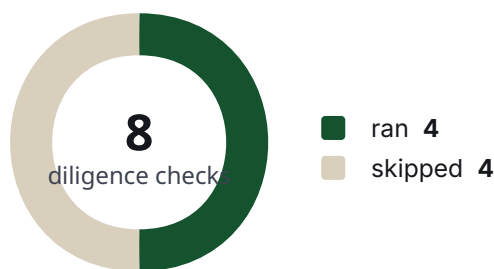

History

never archived

At a glance

Verdict

Held and clean, but not yet in use: the name is ours, unused and unarchived. Before it carries anything real it needs DNS (a site or at least a landing), mail records (MX, SPF, DMARC) and a decision on auto-renew, which is off.

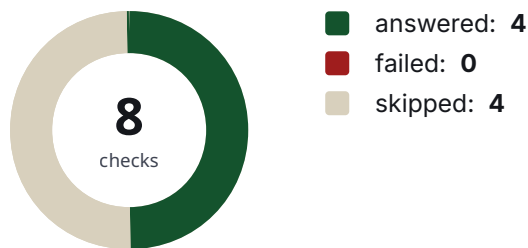

FINDING	STATUS	DETAIL
Registered to us	pass	registered 2026-10-08 by the registrar, expires 2027-10-08, transfer lock on
Auto-renew	unknown	off
Website	unknown	no A/AAAA records: the name does not resolve to a site
Email	fail	no MX, no SPF, no DMARC: cannot receive mail and anyone may send as it
History	pass	never archived by the web archive: a clean, unused name

Run 2026-10-09 17:35 UTC on our own engine; every value is as the engine recorded it. Checks run: registration, dns, history, registrar. Checks the engine skipped this run: reputation, cloviscan, typo, seo.

Diligence dossier

4 answered, 0 failed, 4 skipped, in 18.1 seconds

Registration 192 ms	ANSWERED Registered 2026-10-08, expires 2027-10-08, last changed 2026-10-08. Status: client transfer prohibited.
DNS records 584 ms	ANSWERED 0 A, 0 AAAA, 0 MX, 2 NS, 0 TXT. Does not resolve to a website. No mail servers.
Archive history 16,791 ms	ANSWERED Never archived by the web archive: a clean, unused name.
Registrar check 428 ms	

ANSWERED Not registrable: the name is taken, so the registrar quotes no price.

Reputation

none

SKIPPED Skipped: the blocklist data we would use needs a commercial licence before customers can rely on it.

Site security scan

none

SKIPPED Skipped: our site scanner has no side-effect-free check yet, so we do not run it on someone else's site.

Typo-squats

none

SKIPPED Skipped: the typo-squat scan is not built yet.

Search value

none

SKIPPED Skipped: search value needs a back-port that is still in progress.

CLEAN

Blocklists

6 lists checked

Mail health, from the record checks in this run

Checked 2026-10-09 17:35 UTC with our mail-health checker (a deliverability data provider first, our own DNS checks as the fallback; this run used: vendor, vendor+local).

CHECK	STATUS	DETAIL
MX (receiving)	fail	no mail servers published

CHECK	STATUS	DETAIL
SPF (who may send)	fail	no record: anyone may send as this domain
DKIM (signing)	fail	no key on 20 common selectors
DMARC (policy)	fail	no policy
BIMI (logo)	unknown	no record (optional)

Blocklists

Domain and mail-server blocklists checked: zen.spamhaus.org, bl.spamcop.net, b.barracudacentral.org, psbl.surriel.com, dbf.spamhaus.org, multi.surbl.org. Listed on: **none**. Could not be checked: none.

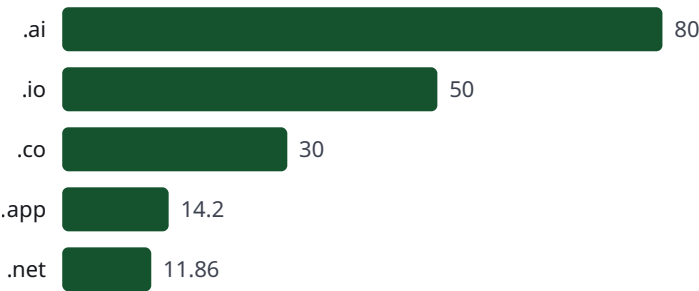

What this means

- no MX records: the domain cannot receive mail
- no SPF record
- no DMARC record
- no DKIM key found on 20 common selectors

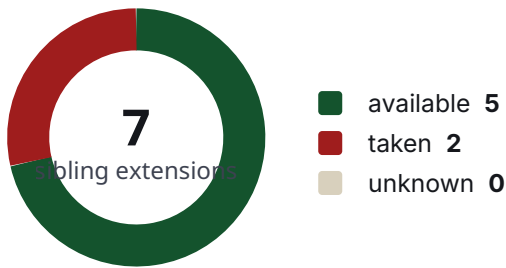

Availability and prices

	REGISTRY	FIRST YEAR	RENEWAL
clovidomains.com	taken	none	none
clovidomains.io	available	\$32.00	\$50.00/yr
clovidomains.app	available	\$8.20	\$14.20/yr
clovidomains.net	available	\$11.86	\$11.86/yr
clovidomains.co	available	\$30.00	\$30.00/yr
clovidomains.ai	available	\$80.00	\$80.00/yr
clovidomain.com	taken	none	none

Sibling extensions and the near twin: registry answer and the registrar's live price at the time of the run.

Renewal price per year by extension (USD, registrar quote)

Sibling extensions and the near twin, with the registrar's live price at 2026-10-09 17:35 UTC.
Registry answers come from RDAP (or WHOIS where a registry has no RDAP).

Handles

	GITHUB	X	INSTAGRAM	FACEBOOK	TIKTOK	YOUTUBE	REDDIT	LINKEDIN
clovidomains	available	unknown	unknown	available	available	available	unknown	available

Handle checks at 2026-10-09 17:35 UTC. "unknown" means the platform could not be checked this run (credential or top-up needed), not a guess.

Handle clovidomains checked per platform at 2026-10-09 17:35 UTC. Where a platform could not be checked the report says so and what it needs, instead of guessing.

PLATFORM	STATUS	DETAIL
github	available	the platform API HTTP 404
x	unknown	platform API credits were exhausted · needs: top-up: X API credits on the developer account
instagram	unknown	platform token rejected : Error validating access token: The session is invalid because the user logged ou · needs: reconnect: Meta user token (platform token is logged out) via our connector
facebook	available	no Facebook Page uses this username (personal-profile usernames are not visible to apps)
tiktok	available	TikTok: user not found (statusCode 10221)
youtube	available	YouTube Data API: no channel with this @handle

PLATFORM	STATUS	DETAIL
reddit	unknown	Reddit refuses unauthenticated API calls (HTTP 403) · needs: connect: Reddit OAuth app (REDDIT_CLIENT_ID/REDDIT_CLIENT_SECRET, free script app)
linkedin	available	LinkedIn company page HTTP 404

Method and limits

- **Diligence job** dlq_713e4c5c8a1e4750: 8 checks requested, 4 ran, 4 skipped by the engine (reputation, cloviscan, typo, seo). Ran 2026-10-09 17:35 UTC.
- **Registry:** live RDAP read. **DNS:** live resolver and the zone at the DNS provider. **History:** web-archive index.
- **Prices:** the registrar’s live quote; nothing was bought. Buying is a founder decision and is switched off in the engine.
- **Mail health:** SPF, DKIM (20 common selectors), DMARC, BIMI, MX and six blocklists.
- **Not done:** reputation, security scan, typo-squat and SEO checks were skipped by the engine this run (modules still partial), so they are not claimed.

Monitors (planned)

PLANNED · NOT IN THIS REPORT

Uptime, certificate, expiry and DNS-drift monitors with alerts.

A timeline of checks per domain: certificate days left, expiry countdown, DNS answers compared with the last snapshot, and the alert that fired.

in this report

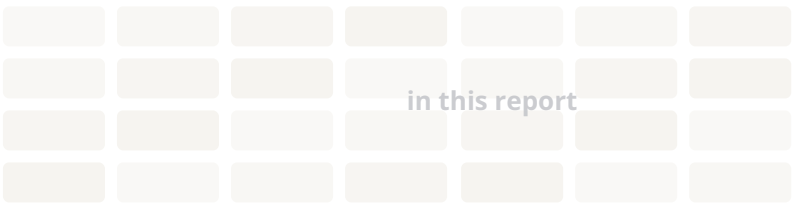

The chart above is a placeholder: no data is shown for a module that has not run.

Protection (planned)

PLANNED · NOT IN THIS REPORT

Typo-squat watch, reputation watch and defensive registrations.

A grid of look-alike names (typo-squats and homoglyphs) with who registered them and when, blocklist appearances over time, and the defensive names worth holding.

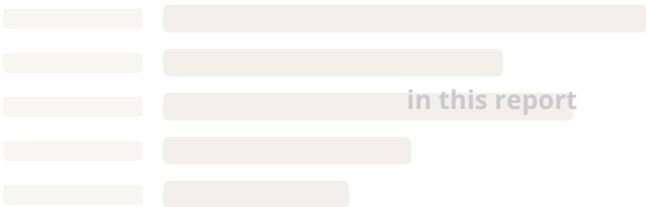

The chart above is a placeholder: no data is shown for a module that has not run.

Market and keyword intel (planned)

PLANNED • NOT IN THIS REPORT

Market and keyword value for a name.

Search volume, cost-per-click and competition for the name and its category terms, with the traffic a rename would put at risk.

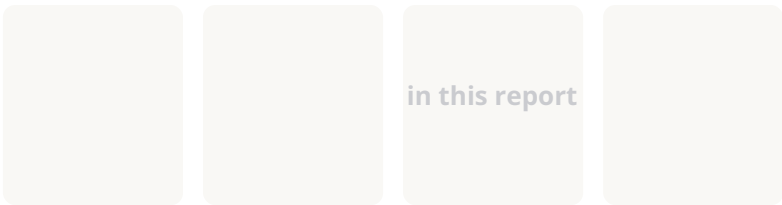

The chart above is a placeholder: no data is shown for a module that has not run.

Email domain health (planned)

PLANNED • NOT IN THIS REPORT

SPF, DKIM, DMARC, BIMI, MX and blocklists as a monitored module.

Today this runs once per report (see Mail health). As a module it re-checks on a schedule and alerts when a record changes or a blocklist lists the domain.

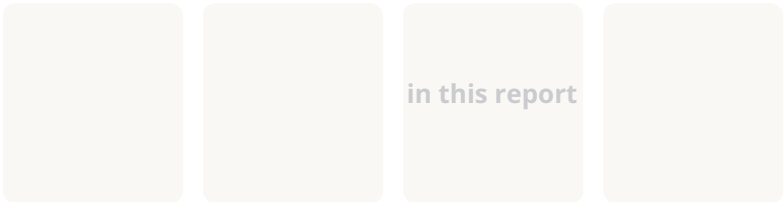

The chart above is a placeholder: no data is shown for a module that has not run.

Acquire (planned)

PLANNED · NOT IN THIS REPORT

A two-step quote and confirm with a one-time token. Buying is switched off.

The registrar's live quote, a confirm step with a one-time token, and the order record.
Purchases stay a founder decision; the engine never buys on its own.

The chart above is a placeholder: no data is shown for a module that has not run.
